Thandlam Uthej Sai

Tirupati, Andhra Pradesh | +91 9966939345 | uthejsaithandlam@gmail.com | LinkedIn | GitHub

Professional Summary

Data-driven B.Tech Computer Science (AI & ML) graduate (2026, CGPA 8.23) with hands-on experience turning raw data into reports, dashboards, and decisions on a live production SaaS platform used by 130+ employees. Proficient in SQL, Python (Pandas, NumPy, Scikit-learn) and data visualization, with a track record of building analytics-facing modules, resolving data/query performance issues, and delivering predictive models. Strong written communication skills, demonstrated through technical documentation and reporting for cross-functional teams.

Technical Skills

Data Analysis & Statistics: SQL, Data Modeling, Database Design, Data Mining, Segmentation, Regression Analysis, Predictive Modeling, Data Cleaning & Preprocessing

Programming: Python (Pandas, NumPy, Scikit-learn), SQL, JavaScript

Reporting & Visualization: Dashboards (Recharts), KPI Reporting, Technical Documentation, Data-Driven Reporting

Databases & Tools: MySQL, SQLite, Git, GitHub, Postman, Excel, VS Code

Other: REST APIs, RBAC, Audit Logging, LLM/RAG Integration, ERP/HRMS Systems

Professional Experience

Python Full Stack Intern — Z.APPS Feb 2026 – Aug 2026

Sricity, India

- Contributed to a live, production multi-tenant HRMS/ERP SaaS used by 130+ employees, working directly with operational data across leave, attendance, and organizational modules.
- Diagnosed and resolved a critical N+1 query performance issue via a bulk role-map refactor, applying analytical thinking to improve database query efficiency and reporting speed.
- Built data-driven dashboard and visualization features (org chart, notifications) using efficient data structures (O(n) tree builder with cycle detection) to represent complex multi-root hierarchical data.
- Designed and queried multi-tenant relational data (MySQL) across a five-layer architecture, ensuring accurate, isolated, and auditable data per client.
- Authored technical documentation and reports on API endpoints and system architecture to support knowledge transfer and cross-team collaboration.
- Built an AI chatbot with RBAC-scoped, audit-logged query access, enabling role-based, self-service access to HR data insights.

Projects

Heart Disease Prediction — Dual Stacked Ensemble

- Built a data pipeline for cleaning, preprocessing, and analyzing patient health data; designed a dual stacked ensemble (regression/classification) that outperformed single-model baselines on real-time predictions.

AI Planner using RAG (Retrieval-Augmented Generation)

- Built a context-aware planning assistant combining document retrieval, vector search, and LLM-generated insights from unstructured data.

Enterprise HRMS ERP System (Live — 130+ Users)

- Developed an AI-driven theme engine that extracts and analyzes color/style data from images to drive per-tenant UI customization.

Education

B.Tech, Computer Science & Engineering (AI & ML) — Siddharth Institute of Engg. & Tech., Puttur 2026

CGPA: 8.23/10

Intermediate (MPC) — Sri Chaitanya Junior College, Tirupati 2022

Marks: 787/1000

Certifications & Achievements

The Joy of Computing Using Python — NPTEL

Python Full Stack Development Certification
